ACKNOWLEDGEMENT

Davangere's farming community plays a vital role in the region, yet farmers face increasing challenges—from climate variations to limited access to modern knowledge and support. This thesis proposes a Farmer Welfare Centre that brings essential services, training, and guidance together under one roof.

The centre provides skill development, agricultural resources, testing facilities, and community spaces, designed in a way that feels familiar, accessible, and sensitive to local climate and culture. Its aim is simple: to support farmers in improving their methods, strengthening their confidence, and building a more sustainable future for agriculture in Davangere.
