

Aim:

I want to design a design firm. In day today life we spend most of the time in office so I want to give the employee a homely feeling and comfort.

In design field there is no fixed time period for working so in this generation where most of the families are nuclear families and both the parents are working they cannot keep their children alone at home so I would like to have a children space for the age group of 6 months – 14 year old child though there will be different segments for different age group. The mother can keep her new born baby in the cradle and can feed and be with it whenever needed. The elder kids can come after their school.

I would also like to have a space for the employees to rest because some people might have to work long and can also stay back if required. I will have a recreation space for the employees to take a break adjacent to that will be the café area. Beyond that I will plan for outdoor seating and landscape.

Site name: Ayurwin Factory

Site Location: Peenya, Doddanna industrial estate, Heggannahalli, Bangalore, Karnataka

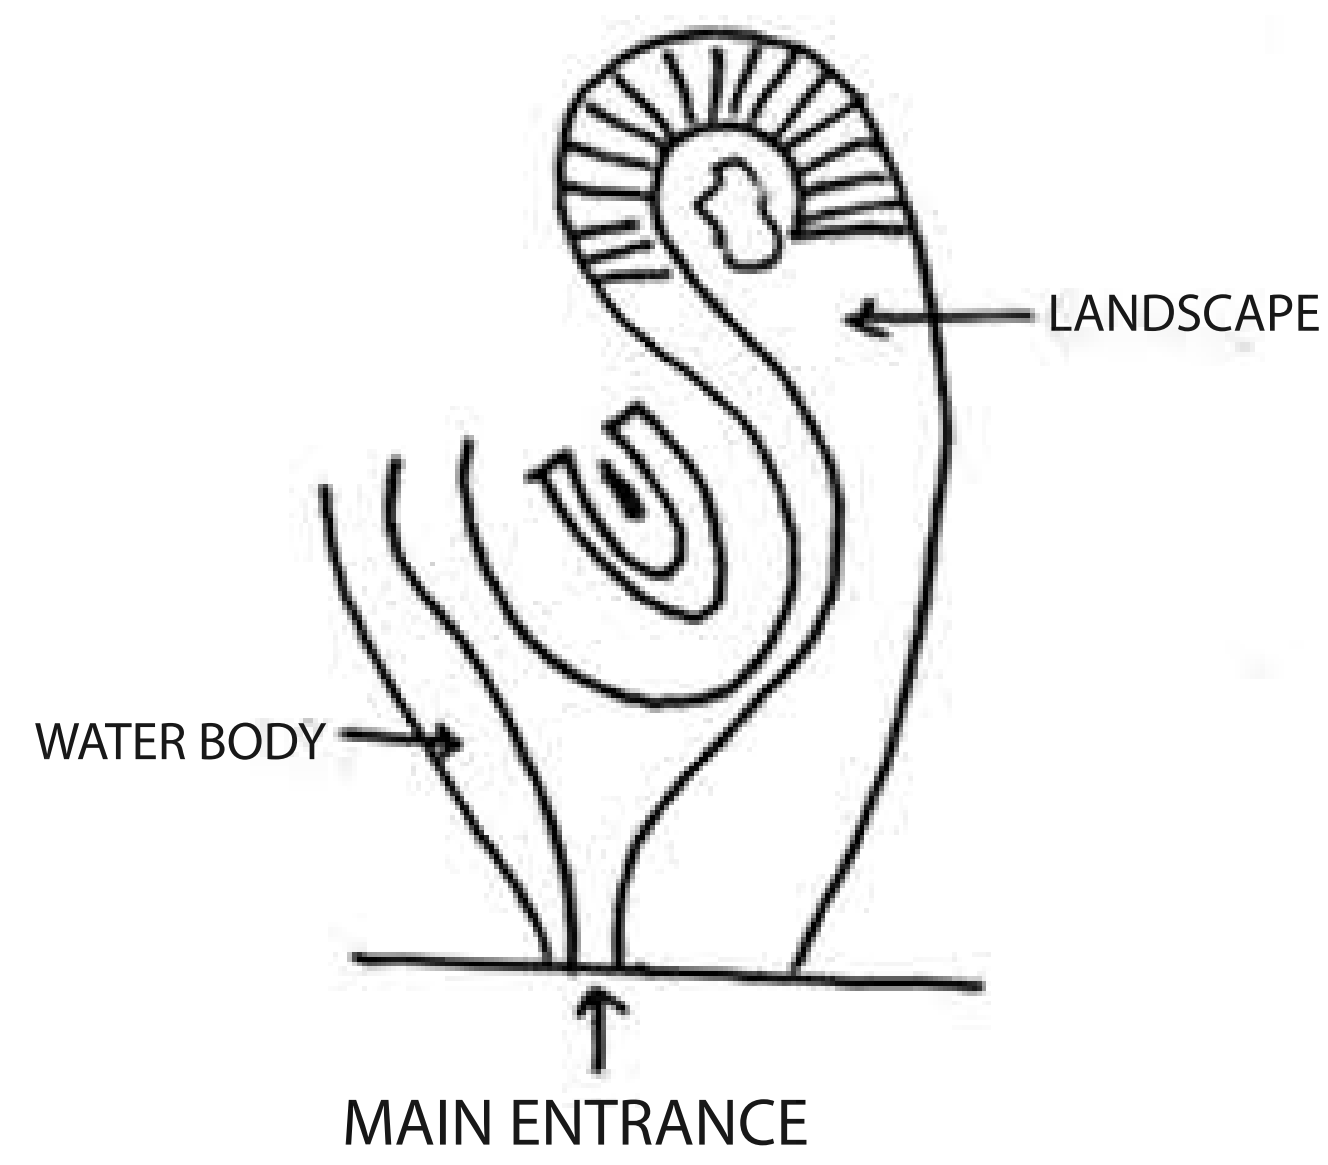

1. This site is a little far from the main city of Bangalore so here there are more chances of construction taking place in future.
2. There are no design firm around this area so this can help in development of the firm.

CONCEPT

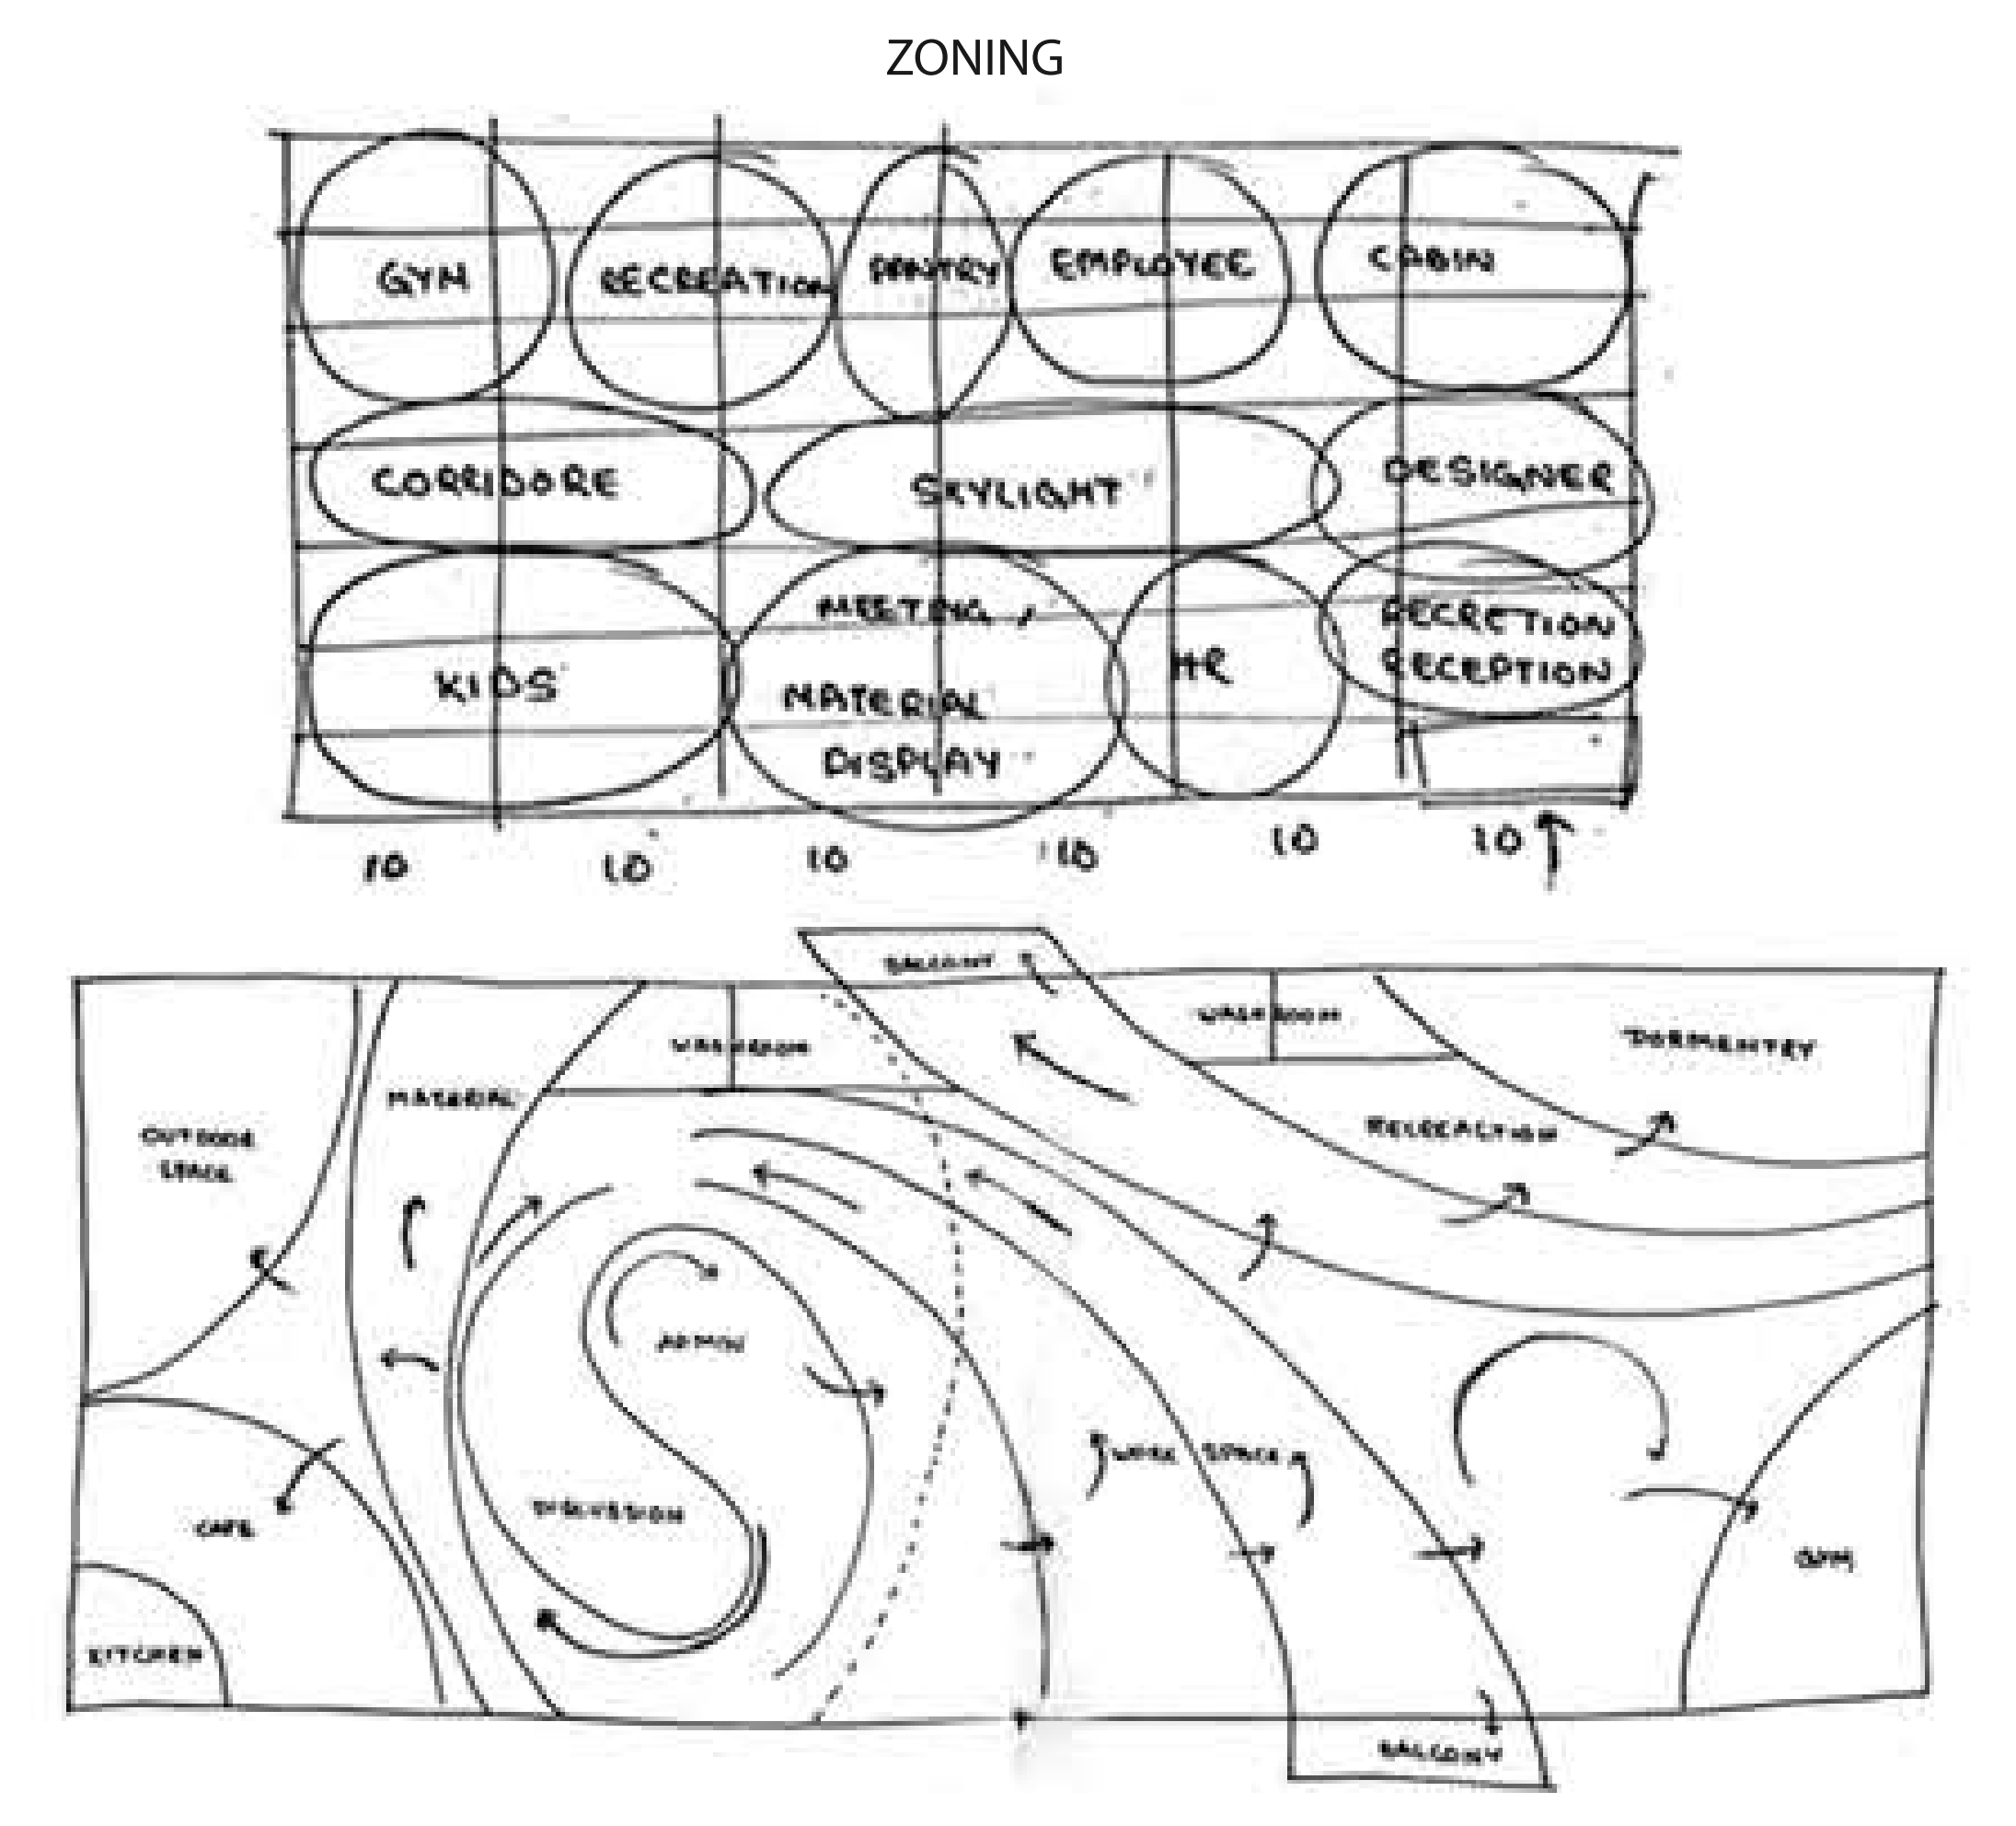

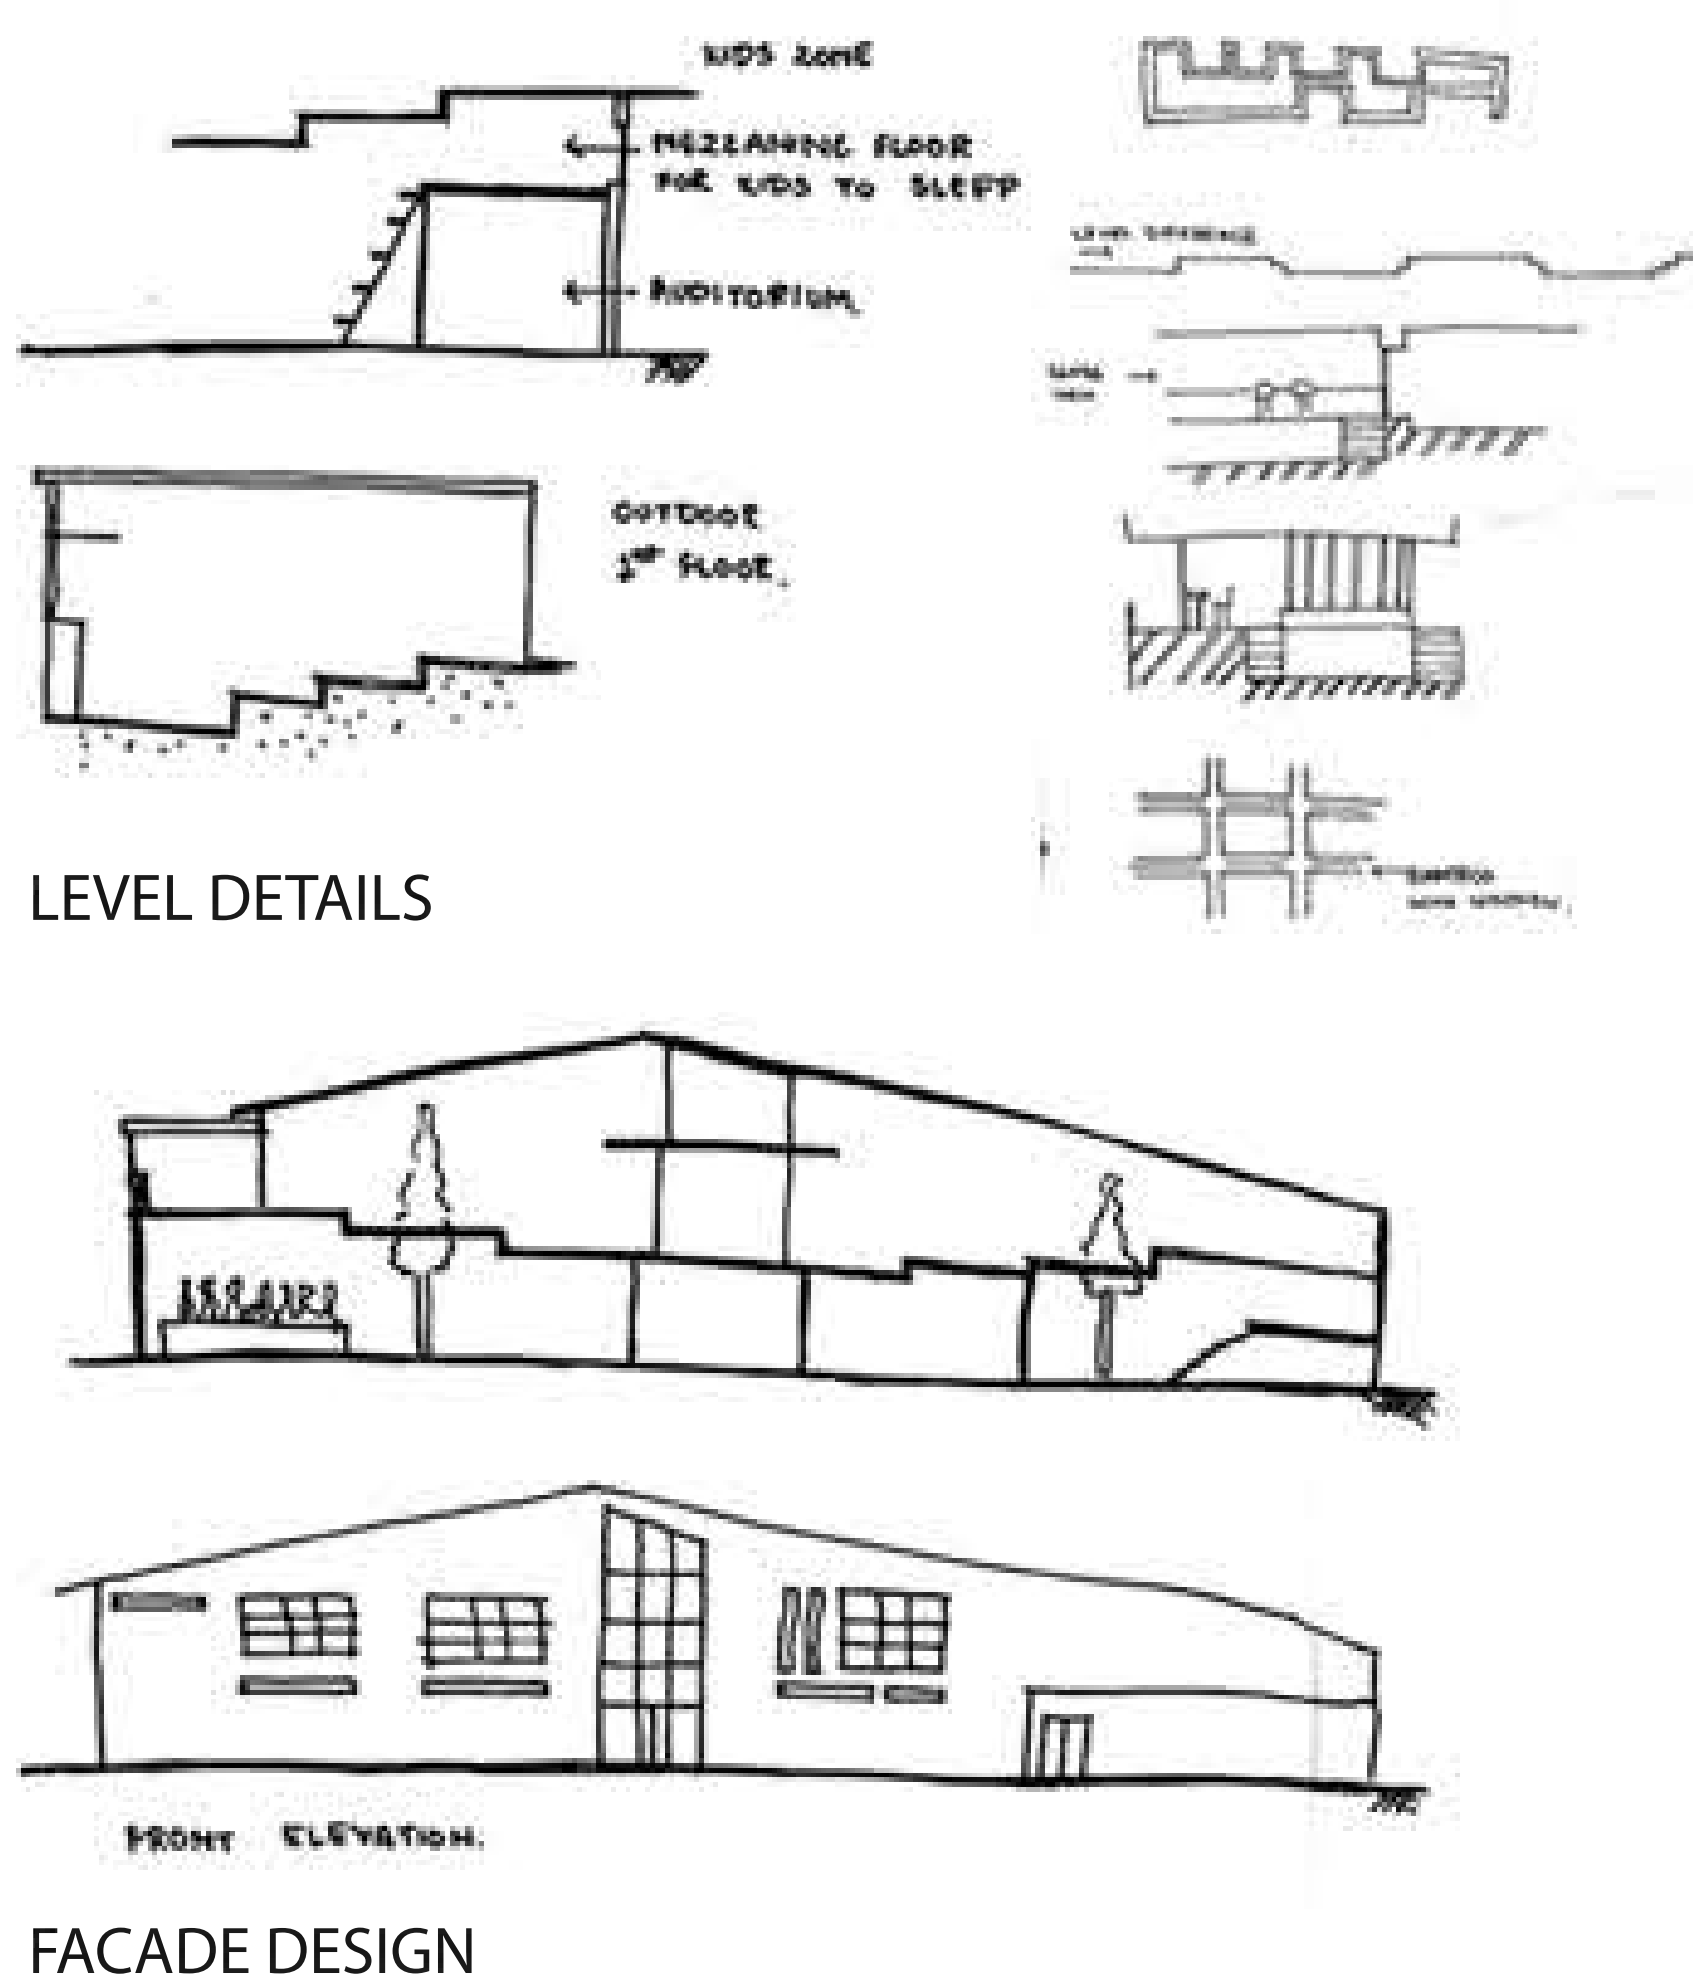

The design of this space is inspired by the concept of finger print .which includes curves,break and continuous lines and patterns with the help of specimen of a finger print, The design gets its- simplest form of curve lines and that further converts into different levels

CONCEPTUAL SKETCH

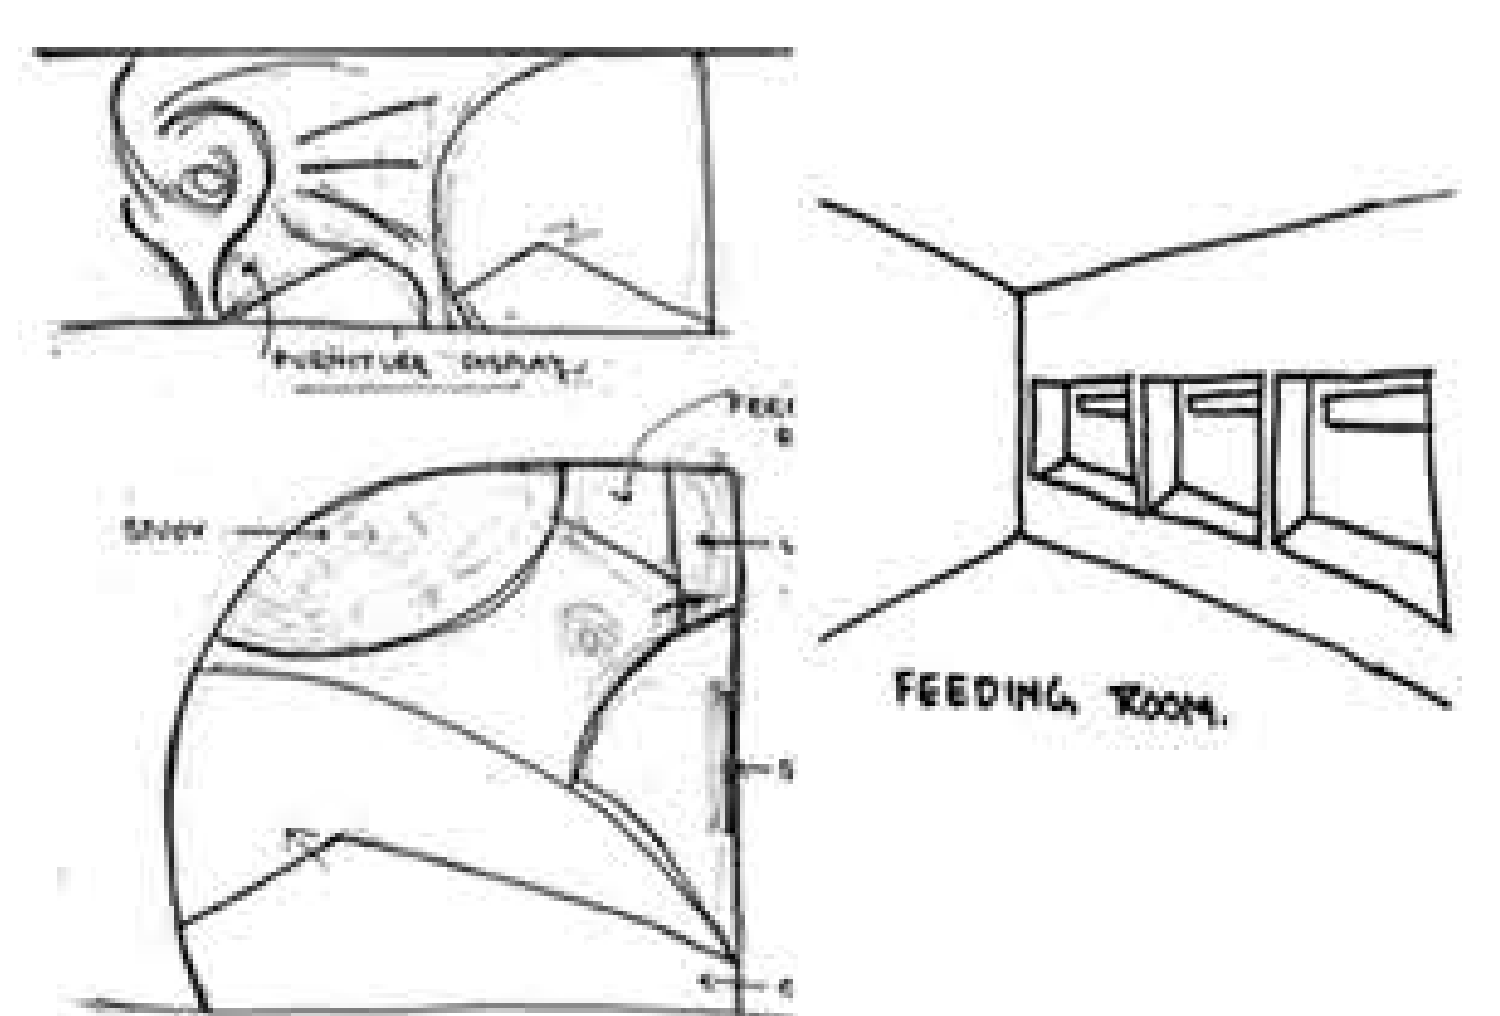

The space is designed for about 60 - 70 people
 Reception space, parking, mock space, service and kids zone in lower ground
 Meeting room, work space cafe, gym, recreation, and dormitory space in the first floor
 Chief designers have a private studio space on the mezzanine floor
