## Fifth Semester B.E. Degree Examination, July/August 2021 Hydraulics and Pneumatics

Time: 3 hrs.

Max. Marks: 100

**Note: Answer any FIVE full questions.**

- 1 a. Define fluid power. List its advantages and disadvantages. (10 Marks)  
b. Explain the basic components of a hydraulic power system with a neat sketch. (10 Marks)
- 2 a. Explain the construction and working of an unbalanced vane pump with a neat diagram. (10 Marks)  
b. An external gear pump has 125mm outside diameter, 85mm inside diameter and 40mm width for a pump speed of 1500rpm. Determine the theoretical volumetric displacement and theoretical flow rate. If the volumetric efficiency is 90%, what is the actual flow rate? (10 Marks)
- 3 a. Explain any two of the mechanics of hydraulic cylinder loading with a neat sketch. (10 Marks)  
b. In a hydraulic operation, the cylinder is required to extend against a load of 60kN and retract against a load of 6kN. If the cylinder bore diameter and rod diameter are 60mm and 20mm respectively, determine pressure for each stroke. (10 Marks)
- 4 a. Explain with neat sketch, the working of any two types of check valves or directional valves. (10 Marks)  
b. Explain the construction and operation of a simple needle valve. (10 Marks)
- 5 a. With neat sketch, explain the operation of cylinder sequencing circuit. (10 Marks)  
b. Explain with neat sketch the operation of automatic cylinder reciprocating circuit. (10 Marks)
- 6 a. Explain what are the different additives used in hydraulic fluids. (10 Marks)  
b. Explain the constructional features and function of a reservoir system. (10 Marks)
- 7 a. Explain with neat sketch Pneumatic power system and also write the advantages of compressed air. (10 Marks)  
b. With neat sketch, explain Rod-less cylinders and also write its advantages. (10 Marks)
- 8 a. With neat sketch explain the operation of pressure regulator. (10 Marks)  
b. Explain with neat sketch the operation of direct and indirect actuation of cylinder. (10 Marks)
- 9 a. With neat sketch, explain the operation of time dependent control circuit. (10 Marks)  
b. Explain the working of coordinated motion control with control diagrams. (10 Marks)
- 10 a. Explain the working of sequential motion control-signal elimination with motion control diagram. (10 Marks)  
b. Explain any two contactors or switches used in electro-pneumatic control system. (10 Marks)

\* \* \* \* \*

Important Note : 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.  
2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice.
