

EXECUTIVE SUMMARY

This is an attempt to find out financial performance and cost of life insurance company, this also helped me to know how financial performance make a important role in a success of the company and to know how theories can be applied to the practical situation. As a master's student in business administration, it is part of the study for everyone to undergo a summer project at a good institute or organization. So, for the purpose, I had the opportunity of summer training at Life Insurance Corporation. My internship project report “A Study Financial performance and cost of life insurance Corporation, Belthangady division”. Before the internship, I had a lot of questions regarding how an organization deals with regards to finance. Through this internship it helped me clear all those questions and doubts. The insurance industry were been changed a lot that it is necessary that knowing its financial performance would make a company to compete better and have good performance in future. There are many key players were been coming to market knowing its financial stability would make a company to survive in long run. The report consists with introduction to the industry and the company profile. And it is also understood that report is deals with theoretical background , and also research is inferred on the company that performing well and also been suggestion were been given for improving the market share and performance well data collection , collecting information about elements that has to be included in the financial performance and cost of company for work life balance and giving recommendation to the company for its improvement.
