ACKNOWLEDGEMENTS

The successful completion of this thesis would not have been possible without the valuable contributions of several individuals.

I am highly indebted to my thesis guide, Prof. Deepalakshmi.C for her backing, support and guidance throughout the duration of the thesis. I thank her for providing me with valuable inputs which helped me fulfil the requirements of the thesis.

I'd also like to express my gratitude to Prof. Anjana Biradar, Prof. Kinjal Shah and Prof. Neha Mahindrakar for their patience, wisdom, and guidance at times when I faced specific difficulties.

Further, I extend gratitude to Prof. Sheeraz Zaidi (Dean, A.N.R.V.S.A) for his support and encouragement. I'm grateful to the professors and teaching staff of our department, for the knowledge they have imparted to me over the last four years.

PREFACE

Coliving, a new typology of housing design, has recently been gaining in popularity. Coliving is a form of rental housing that seeks to create community among its residents by providing features such as extensive shared spaces and community managers paired with typically small, furnished private spaces. Two reference projects are presented that ties in to the issue in different ways, followed by the case studies and analysis of different architectural qualities and the design strategies are elaborated.

For my thesis i have chosen co-living spaces, To cater to people who are entirely location independent because of the nature of their work, who can live, work anywhere they choose to. And set up as a Commercial campus which facilitates young business entrepreneurs with the all the resources they need to invent meaningful solutions for everyday problems.
