ABSTRACT

"A Study to assess the effectiveness of planned teaching program on knowledge regarding breast cancer and its prevention among degree students in selected degree colleges, Bengaluru."

Background

Objectives:

1. To assess the knowledge level among the degree students regarding breast cancer and its prevention in terms of pre-test score.
2. To develop the planned teaching programme on prevention on breast cancer.
3. To assess the effectiveness of planned teaching programme by comparing the pre-test and post-test knowledge score differences.

Methodology:

Descriptive approach was used to collect data from 50 subjects selected by simple random technique through non probability sampling approach consisting 2 sections.

Section A: Demographic variable consisting of 12 items.

Section B: Structured questionnaire for assessing knowledge level consisting of 23 items.

Result: The finding of the study with regard to pre-test knowledge assessment revealed that the mean percentage was 56.15% with standard deviation 2.14. In post-test significant increases in knowledge was 70.16% with standard deviation 1.74.

TABLE OF CONTENT

Chapter No	Chapter title	Page No.
1	Introduction	10 – 12
2	Need for the study	13 - 17
3	Objectives	18 - 20
4	Review of literature	21 - 26
5	Methodology	27 - 33
6	Result	34 - 45
7	Discussion	46 - 47
8	Conclusion	48 - 51
9	Summary	52 - 54
10	Reference	55 - 56
11	Annexure	57 - 69

LIST OF TABLE

Table No.	Table name	Page No.
1	Frequency and percentage according to gender respondent	27
2	Distribution of respondents by their religion	27
3	Frequency and percentage distribution of respondent according to their previous knowledge	28
4	Frequency and percentage distribution of respondent according to history of breast cancer	29
5	Frequency and percentage distribution of respondent according to age of respondent	30
6	Frequency and percentage distribution of respondent according to place of resident	30
7	Frequency and percentage distribution of respondent according to type of family	31
8	Frequency and percentage distribution of respondent according to family monthly income	32
9	Frequency and percentage distribution of respondent according to age of attainment of menarche	33
10	Frequency and percentage distribution of respondent according to any habits of smoking and drinking alcohol	34
11	Mean, mean percentage and standard deviation for pre-test knowledge of respondents on knowledge regarding breast cancer	35
12	Mean, mean percentage and standard deviation for post-test knowledge of respondents on knowledge regarding breast cancer	35
13	Comparison between pre-test and post-test result	35
14	Association of post-test level knowledge score of subject with demographic variables	37
15	Comparison of pre-test and post-test knowledge regarding breast cancer	37
