ACKNOWLEDGEMENT

First and foremost, I offer my deepest gratitude to my guide **Mrs. Komali Rao**, who has supported me throughout my thesis with her patience and knowledge, giving me the room to work at my own ways. I thank ma'am for her excellent guidance, care, and patience and for providing me with an excellent atmosphere for conducting this research.

I would like to express my sincere appreciation and gratitude to the **Dean** for giving us the inspiration and support that was required.

I am deeply indebted to **Prof. Priya Joseph,** who has always been willing to help by giving best advice and instructions. Her constant inspiration and guidance kept me focused and motivated.

I would like to thank our **Library Staff** for providing me all the valuable information and co-operate in the completion of my thesis successfully.

Last but not the least I thank my **family and friends** for their constant support and understanding during the course of the project.

SUMMARY:

VERTICAL NEIGHBOURHOOD

Vertical neighborhood is basically a **mixed-use skyscraper** accommodating **commercial, residential and office spaces** including the amenities and services required for these spaces.

The idea of introducing the concept was to bring in a new idea to the word neighborhood. Neighborhood has been an idea of creating residential space also including a certain percentage of other spaces making it into a mixed-use space. So, the idea of vertical neighborhood was to bring in modernism into the same idea by **designing the neighborhood vertically**.

Since the idea is still a new one and has been used in very few buildings so the location of the site selected for the proposal is **Mumbai** which is a **city of skyscrapers** and so the building design restrictions are a bit open to tall structures, giving more freedom towards designing.
