ABSTRACT

The Wildlife an Eco-Resort is a medium through which it connects common people to nature and wildlife. One can reach the state calmness and tranquility when spent time in nature. Through architectural built environment the purpose of establishing connection between man and nature is achieved.

The purpose of an eco-resort is not only a solution to solve relations of humans and nature but also to promote eco-tourism. Eco-tourism is a travel way in which common can experience the nature while also keeping in mind that no harm is caused to the nature. How can the connections of humans, animals and wildlife be strengthened through an architecture design?

By spending time in nature humans learn the ways of nature and how the nature functions. By just merely being present among the nature and visualization has seem to have various effect on humans physically and mentally. When participating in activities that take place surrounding or in nature or natural elements one can understand the ways of nature and importance of nature.

It's a cyclic procedure where eco-resorts will bring humans closer to nature and develop the tourism through which forest regions can be expanded which in turn promotes eco-tourism.
