ACKNOWLEDGEMENT

Before proceeding, I would like to express my gratitude to all those who, aided me in preparing this paper. Without the professional guidance of the professors, no academic project or endeavor can be completed successfully. I would especially want to thank my mentor, **Ar. Sushma M Betgeri**, who has been guiding me throughout the thesis. Thank you ma'am for helping me and supporting me. With your guidance, I was able to finish my project with a clear idea of how the concept and design can be integrated.

I really would like to express my gratitude to my parents for providing me with steady moral support over the course of my study as well as to the numerous others who contributed their time, energy, and spirit to this study. For it to be successful, these need to be supported by people's advice and help.

I also want to thank all the faculties for providing me with the assistance I needed to learn the necessary information. In the end, I would like to thank **Acharya's NRV School of Architecture**, for providing me with the opportunity to work on this project.

Varsha KM

ABSTRACT

A vital component of any person that has the potential to give them power is education. Even though the value of education is evident in all aspects of life around the world, the right to education is undervalued and generally taken for granted in rural communities. In rural areas, the project aims to assist and enhance early childhood education. Using the knowledge gained, create a prototype initiative for education-based development assistance in rural areas. This will involve actions that will propagate the value of education among the rural community. To build an educational institution for rural people with all the comforts and current teaching techniques so that it helps to bring out the finest versions of the rural youngsters
