CERTIFICATE

This is to certify that this thesis report titled Science City by **Anil Kumar G** of IX Semester B. Arch, USN No. 1AA19AT008, has been submitted in partial fulfillment of the requirements for the award of undergraduate degree **Bachelor of Architecture (B.Arch)** by Visveshwaraya Technological University VTU, Belgaum during the year 2023- 24.

Guide: Ar. Malavika Jayachandran

DECLARATION

This thesis title “**Science City**”, submitted in partial fulfillment of the requirement for the award of the undergraduate **Bachelor of Architecture** is my original work to the best of my knowledge.

The sources for the various information and the data used have been duly acknowledged.

The work has not been submitted or provided to any other institution/ organization for any diploma/degree or any other purpose.

I take full responsibility for the content in this report and in the event of any conflict or dispute if any, hereby indemnify **Acharya’s NRV School of Architecture** and **Visveshwaraya Technological University, Belagavi**, and its official representatives against any damages that any raised thereof.

Anil Kumar G

1AA19AT008

ABSTRACT

The thesis explores the concept of a science city as a dynamic and multifaceted space for promoting science education, public and engagement. Furthermore, it examines key design principles and considerations for creating and engaging science city environments.

This Science City proposes the development of an expansive science education and popularization platform at the state and national levels, designed to foster an enhanced appreciation for science through entertainment. Termed "edutainment," the initiative aims to impact the general populace by providing an experiential and engaging approach to scientific understanding.

The envisioned Science City serves as a dual-purpose space, attracting diverse crowds seeking entertainment and children driven by curiosity and enjoyment. Characterized by the fusion of education and entertainment, the Science City strives to not only educate but also captivate and engage its visitors in a multifaceted exploration of scientific concepts.

ACKNOWLEDGEMENT

I am honored to express my gratitude and appreciation to everyone who has contributed to the successful completion of my thesis.

First and foremost, I would like to express my heartfelt gratitude to my thesis guide Ar. Malavika Jayachandran for her valuable guidance, unwavering support, and endless patience throughout this process. Constructive feedback and insightful comments have been instrumental in shaping and refining my research.

I am also grateful to the Principal Prof. Ar. Sanjyot Shah and faculty members who have generously shared their knowledge and expertise with me. Their lectures, discussions, and feedback have enriched my understanding of the subject matter and broadened my horizons.

Furthermore, I would like to express my appreciation to my parents and friends for their encouragement, motivation, and inspiring discussions. Their constructive criticism and insightful feedback have helped me to refine my ideas and develop my arguments.

I am grateful to everyone who has contributed to the completion of my thesis, and I hope that my work will contribute to the advancement of knowledge in the field of architecture.
